

HealthTALK

WINTER 2019 | ¡VOLTEE PARA ESPAÑOL!

What do you think?

In a few weeks, you may get a survey in the mail. It asks how happy you are with UnitedHealthcare Community Plan. If you get a survey, please fill it out and mail it back. Your answers will be private. Your opinion helps us make the health plan better.

Preteen vaccines.

Immunizations keep kids healthy.

When your child turns 11 or 12, it's time for another round of shots. These shots are given at your preteen's annual checkup. These vaccines help protect your children, their friends and your family members from serious diseases. The next time you take your middle-schooler to your health care provider, ask about the following shots:

- **HPV.** Prevents human papillomavirus.
- **Meningococcal conjugate.** Prevents bacterial meningitis.
- **Tdap.** Prevents tetanus, diphtheria and pertussis.

If your child missed any of these shots, it's not too late to make them up.

It's your best shot. Learn more about vaccines for every member of your family at [CDC.gov/vaccines](https://www.cdc.gov/vaccines).

UnitedHealthcare Community Plan

Ridgeland, MS 39157

Recognizing opioid addiction.

Drug overdoses are now the leading cause of death in people under 50. The recent rise in overdoses is due to a sharp increase in opioid use. Opioids include prescription drugs such as Vicodin and Oxycontin. They also include heroin and other illegal drugs.

Many people who become addicted to opioids started using them when they were prescribed for pain. Others misused leftover pills from a friend or family member. Anyone can get a substance use disorder.

Treatment can help people stop using opioids. Medication-assisted treatment (MAT) helps. It uses medicine that blocks the high and reduces drug cravings. MAT also eases patients' withdrawal from opioids. By helping with the physical aspects of addiction, MAT helps patients focus on recovery.

Need help? Treatment for substance use disorders, including MAT, is a covered benefit. Call the Substance Abuse and Mental Health Services Administration's Treatment Referral Routing Service at **1-800-662-HELP (4357)** to begin recovery.

Sleep tight.

Tips for preventing SIDS.

You can reduce the risk of sudden infant death syndrome (SIDS). SIDS is when a baby dies of unknown causes in his or her sleep. The most important way to prevent SIDS is to always place your baby on his or her back to sleep, for naps and at night. Other tips include:

- Put your baby's sleep area next to where you sleep. Share a room, but not a bed.
- Use a firm sleep surface, such as a mattress in a safety-approved crib, covered by a crib sheet.
- Breast-feed your baby.
- Do not put pillows, blankets, bumpers or stuffed animals in the crib.
- Dress your baby in lightweight clothing for sleep.

Ask Dr. Health E. Hound.®

Q: Why does my child need to be tested for lead?

A: Lead is often found in plumbing or paint in older homes. It can also be found in painted toys. Because babies and toddlers often put their hands and toys in their mouths, they can swallow lead. They can also inhale it.

When lead gets into the body, it can end up in the blood, bones or organs. Too much lead in a child's body leads to lead poisoning. It can result in slow growth or developmental problems.

Many children with lead poisoning don't have symptoms. That's why testing is important. Experts recommend testing at ages 1 and 2.

Learn about lead. Read all about lead poisoning and other kids' health topics. Visit **KidsHealth.org**. Does your child need to be tested? Ask his or her doctor.

Know the signs.

Could your child have diabetes?

Type 2 diabetes used to be called adult-onset diabetes. Today, it is becoming more common in kids. Symptoms usually start so slowly you might not notice them. Some people with type 2 diabetes have no symptoms. Ask your child's doctor to check for diabetes if your child:

- Urinates often or starts wetting the bed.
- Is very thirsty or hungry.
- Loses weight, or doesn't gain weight as he or she grows.
- Often feels tired.
- Takes a long time for wounds to heal.
- Gets yeast infections before puberty.
- Has blurred vision.
- Has fruity-smelling breath.
- Gets dark, thick patches of skin around the neck, armpits or groin.

 **We can help.** If your child has diabetes or another chronic condition, we can help. We offer disease management programs. They help you manage your condition.

To learn more, call Member Services toll-free at **1-800-992-9940**, TTY 711.

Did you know?

After you have your baby, the Department of Medicaid has a Family Planning Waiver program. It will provide additional coverage for family planning and some medical services for up to 1 year if you are eligible. You can apply before your baby is born by contacting the MS Division of Medicaid's Office of Eligibility toll-free at **1-800-421-2408**. Or you can apply in person or online at **medicaid.ms.gov**.

Lean lunch.

Use leftover chicken breast for a healthy lunch the next day. Make a chicken club wrap lunch box. Add even more fruits and vegetables on the side to add more nutrients and fiber.

INGREDIENTS

- 1 10-inch flour tortilla or sandwich wrap
- 1 cup cooked chicken breast, chopped or sliced
- 1 small tomato, chopped or sliced
- 1 cup romaine lettuce or spinach, shredded
- ¼ cup low- or nonfat salad dressing (optional)

FOR SIDES:

- 8–12 baby carrots
- ¼ cup grapes or berries

DIRECTIONS

Layer chicken, tomato and lettuce or spinach on the tortilla within 1 inch of edges. Drizzle with light salad dressing, if desired. Fold opposite sides of tortilla up toward center, about 1 inch over filling (sides will not meet in center); roll up tortilla, beginning at 1 open end. Cut diagonally in half. Add side servings of carrots, grapes or berries.

Resource corner.

Member Services: Find a doctor, ask benefit questions or voice a complaint, in any language (toll-free).

1-800-992-9940, TTY 711

9 facts about depression.

Things to know when you're feeling down.

- 1. Depression affects your thinking.** If you have thoughts of suicide, please call someone right away. You can call the National Suicide Prevention Lifeline at **1-800-273-TALK (8255)** or the National Hopeline Network phone at **1-800-SUICIDE (1-800-784-2433)**.
- 2. Depression makes it hard to give.** It's hard to think of other people when you're depressed.
- 3. Depression is often experienced as anxiety.** Make sure you get a correct diagnosis. This will help you get the best treatment for you.
- 4. Ongoing irritability can be a symptom of depression.**
- 5. Chronic pain can also be a symptom of depression.** At the same time, being in continual discomfort can cause you to become depressed.
- 6. Alcohol is a depressant.** So are marijuana and many other recreational or street drugs. Using these substances could make you feel worse in the long run.
- 7. People don't choose to be depressed.** But they do make a choice about how to deal with it.
- 8. Exercise is the easiest and least expensive cure for depression.** Walking just 30 minutes a day can help.
- 9. Sometimes talk therapy can work wonders.** Think about seeking counseling.

More information, tools and resources for depression can be found at the Live and Work Well website. To access Live and Work Well:

- Go to **LiveandWorkWell.com**.
- If you do not know your access code, click on "I don't know my access code."
- Scroll down to select your health plan in the list of UnitedHealthcare Community Plan options.
- Click on "Enter."
- Go to the "Mind and Body" drop down.
- Select "Mental Health."
- Scroll down to select your topic. Topics include depression as well as other mental health conditions.
