FALL 2019

Trick or treat.

According to the Centers for Disease Control and Prevention, most Americans eat and drink too many added sugars. When passing out Halloween treats this fall, consider snacks such as pretzels, popcorn, sugar-free gum and trail mix. These are healthier options than candy.

Fight the flu.

Get a flu vaccine this season.

The flu virus is very common. An annual flu shot is the best protection. Everyone aged 6 months and older should get a flu shot each year. You need to get one every year because each flu season is different.

Here are 3 other things you can do this fall to keep from getting the flu:

- Wash your hands often with soap and water.
- Eat well, exercise, drink lots of water and get enough sleep.
- Cover your nose and mouth when you cough or sneeze.

 **It's your best shot.** There is no cost to you for flu shots. The best place to get one is at your primary care provider's (PCP's) office. You can also get one at any clinic or store that accepts your plan. Visit myuhc.com/CommunityPlan to find a location near you.

Be heart smart.

Congestive heart failure (CHF) is a disease that affects your heart. It means that the heart does not pump well and less blood gets to your muscles and organs. CHF causes shortness of breath (especially while exercising or lying flat in bed), fatigue, weakness and swelling in the ankles.

CHF affects almost 6 million adults in the U.S. About half of the people diagnosed with CHF will die within 5 years of being diagnosed.

If you're diagnosed with CHF, your provider will recommend treatment and lifestyle changes. This includes resting more or changing your daily activities, eating a low-salt diet and taking medication.

Taking action to prevent CHF is the best way to avoid it. You can reduce your risk by controlling your blood pressure, losing weight if your doctor says you should, exercising and eating less salt.

Mammograms save lives.

Schedule your screening.

Breast cancer is one of the most common cancers in women. An estimated 268,600 U.S. women will be diagnosed with it this year.

October is breast cancer awareness month. It is a good time to schedule a mammogram if you are due for one. A mammogram is an x-ray of the breast. It is used to find breast cancer early, before you notice a lump. When caught early, breast cancer is often curable.

Talk to your doctor about your breast cancer risk factors. These include your family and personal health history, ethnicity and lifestyle. Every woman should have a baseline mammogram between ages 35 and 40, and annually thereafter.

Are you at risk? Talk to your doctor about your risk factors for breast cancer. For help scheduling an appointment or finding a provider, call Member Services toll-free at **1-800-941-4647, TTY 711**. Or visit myuhc.com/CommunityPlan.

Plan to quit.

Tobacco use is the largest preventable cause of disease and death. There is no safe way to use tobacco. If you use tobacco, consider quitting during the Great American Smokeout®, a national event hosted by the American Cancer Society. This year the event falls on November 21.

Quitting time? You can quit smoking for good with the right help. Get telephone support and information by calling the QuitLine at **1-800-QUIT-NOW (1-800-784-8669), TTY 711.**

Measles is on the rise.

Is your child protected?

Measles is contagious and can spread quickly. More than 900 cases of measles have been confirmed in 24 states this year. That's almost 9 times the number of cases that were reported in 2017.

The majority of people who get measles are unvaccinated. That's why it is important to be up-to-date on vaccinations.

You can protect your child against measles with a shot that protects against 3 diseases: measles, mumps and rubella (MMR). The MMR vaccine is proven to be safe. The Centers for Disease Control and Prevention recommends children get 2 doses of it:

- First dose at 12–15 months.
- Second dose before entering school (ages 4–6).

Outbreaks of vaccine-preventable diseases are serious. Vaccinate your child and help keep your community safe.

Ask the doctor. Ask your child's provider for a copy of their immunization record. Make sure your child has gotten all the shots they need.

Let it go.

It's perfectly natural to feel stressed sometimes. Everyone does. Not all stress is bad, but long-term stress can affect your health. That's why it's important to manage it. Here are 4 tips on how to cope with stress:

- 1. Get regular exercise.** Just 30 minutes per day of walking can help boost your mood and reduce stress.
- 2. Try a relaxing activity.** Meditation, yoga and tai chi can be relaxing. Drawing or coloring can also be calming.
- 3. Set goals and priorities.** You don't need to do everything at once. Decide what needs to be done now and what can wait.
- 4. Stay connected.** It's OK to turn to friends, family or health care providers for emotional or other support.

Relax. To learn about your behavioral health benefits, call Member Services toll-free at **1-800-941-4647, TTY 711.**

Controlling your blood pressure.

Bring it down.

Controlling your blood pressure can help you prevent heart disease. If you have hypertension (high blood pressure), these tips can help you lower it. If your blood pressure is normal, these tips can help keep it that way.

- 1. Maintain a healthy weight.** Lose weight if your doctor says you should.
- 2. Get moving.** Aim for 30 minutes of moderate activity a day.
- 3. Eat well.** Eat more fruits, vegetables and lean proteins. Reduce saturated fat. Read labels on packaged foods.
- 4. Reduce sodium.** Choose other spices to add flavor to foods. Limit processed and restaurant foods.
- 5. Limit alcohol.** One drink a day for women or two for men is a moderate amount. Or, don't drink any alcohol.
- 6. Take your medicine.** If your doctor prescribes blood pressure medicine, take it as directed. Use notes, alarms or phone calls to help you remember.

Get checked. A healthy blood pressure is 120/80 or lower. High blood pressure is 130/80 or higher. A reading in between is considered prehypertension, or borderline high blood pressure.

UnitedHealthcare Community Plan does not treat members differently because of sex, age, race, color, disability or national origin.

If you think you were treated unfairly because of your sex, age, race, color, disability or national origin, you can send a complaint to:

Civil Rights Coordinator
UnitedHealthcare Civil Rights Grievance
P.O. Box 30608
Salt Lake City, UTAH 84130
UHC_Civil_Rights@uhc.com

You must send the complaint within 60 days of when you found out about it. A decision will be sent to you within 30 days. If you disagree with the decision, you have 15 days to ask us to look at it again.

If you need help with your complaint, please call the toll-free member phone number listed on your health plan member ID card, TTY 711, 24 hours a day, 7 days a week.

You can also file a complaint with the U.S. Dept. of Health and Human Services.

Online:
