Stay covered

Watch for important updates

The rules for keeping your Medicaid coverage may be changing. It's important to stay informed so you can keep your benefits.

You may need to take action to keep your coverage. This could include things like updating your information or completing certain requirements.

Watch for messages from your state's Medicaid agency. These messages will tell you what you need to do and when to do it.

Staying on top of these updates can help you avoid gaps in your coverage.

Digital skills

Learn new digital skills at your library

Your local library may offer classes to help you use technology and find trusted health information online at no cost.

Programs like Digital Pathways from the American Library Association help adults build confidence using the internet, email, video calls and online services. These skills can support your health, work and daily life.

Libraries are safe, welcoming places that offer free support and learning opportunities.

Try something new.

Call or visit your local library to learn about classes that can help you build your skills.

Healthy looks different for everyone

For some, it may mean eating balanced meals or staying active. For others, it may mean getting enough rest, managing stress or taking care of ongoing health needs. Small steps can help support your health in ways that work best for you.

Flu shot

Protect yourself this flu season

Flu season is here. The flu can spread easily from one person to another.

The flu is more serious than a cold. Each year, many people get sick. Some may need to see a doctor or go to the hospital.

Getting a flu shot is the best way to help protect you and the people around you. It can help keep you from getting sick and may help prevent serious illness.

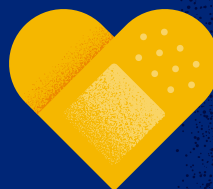

Flu shots are covered at no cost to you. They are quick and simple to get.

Getting a flu shot each year matters. The flu virus can change, so this helps protect you each season.

Stay protected this season

Visit your doctor or a nearby pharmacy to get your flu shot.

Cancer screenings can save lives

Taking care of your health is very important. Cancer screenings are simple tests that help find cancer early. When cancer is found early, it can be easier to treat.

Screenings for men and women

- Colon cancer screening
- Lung cancer screening (for people who smoke now or used to smoke a lot)

Screenings for women

- Breast cancer screening (mammogram)
- Cervical cancer screening (Pap test or HPV test)

Screenings for men

- Prostate cancer screening

Not everyone needs the same tests. Your age, family history and health can change what screenings you need. **Talk to your doctor to find out which tests are right for you.**

Extra support for a healthy pregnancy

If you are pregnant or planning to be, your health plan may offer extra support.

Healthy First Steps is a program that supports you during pregnancy and after your baby is born. It connects you with a health support team who helps you stay on track and get the care you need.

Your health support team will work with you to create a plan and help you stay on track with care before and after your baby is born.

The program may help you:

- Schedule doctor visits and find a ride
- Manage your care during pregnancy
- Get help after your baby is born
- Find local programs and services

If you need extra help, your health support team can check in and help coordinate your care.

Managing stress

Take a break for your mind.

Everyone feels stress sometimes. Stress can happen when you are busy, worried, or having a hard day. Too much stress can make you feel tired, sad, or upset.

The good news is that there are simple ways to help manage stress.

Try taking a few deep breaths. Breathe in slowly through your nose and out through your mouth. Go for a short walk, stretch your body, or spend time outside. Talking to a friend or family member can also help.

Make time for things you enjoy. You might read a book, listen to music, draw, or play with your children. Getting enough sleep each night can also help your mind and body feel better.

If stress does not go away or starts to affect your daily life, it is okay to ask for help. You do not have to handle it alone.

Take the next step:

Talk to your health care provider if stress is making it hard to enjoy your day or take care of yourself.

Plan benefits

Check your benefits — you may have more than you think

Do you know what your health plan covers?

Many people do not use all of their benefits. Checking your plan can help you understand what you have.

You can use the UnitedHealthcare app to see your benefits. When you log in:

- Go to the “Benefits” section
- Tap on your plan
- Look at what services are covered
- Check what your plan has paid and what you may owe

Knowing your benefits can help you make better choices and avoid surprise costs.
