Your journey to better health

Stay covered – watch for important information from your state

The rules to keeping your Medicaid coverage may be changing. Watch for a message from your state's Medicaid agency. It will tell you what you need to do to keep your coverage.

Community Resources

Where to turn for help.

UnitedHealthcare Community Resources connects you to programs across the country that offer support at low or no cost.

Find help in your area, including:

- Back-to-school clothes and supplies
- Transportation assistance for school or work
- Food pantries and community gardens

To get started: Open the **UHC mobile app** and tap the **Community Resources** tile found under **Benefits**.

Medications, blood pressure and heat

Other medicines can make it harder for your body to cool down or adjust to the heat. Heat can also lower blood pressure by causing blood vessels to relax. Together, heat and medicine can sometimes make people feel dizzy or weak.

Drinking water, staying cool and paying attention to how you feel can help protect your heart during hot weather.

Keep your skin safe from the sun

Most skin cancers are caused by too much sunlight. The sun gives off ultraviolet (UV) rays. You cannot see UV rays, but they can hurt your skin. UV rays also come from tanning beds and sunlamps. Over time, they can damage skin cells.

The easiest way to protect your skin is by using sunscreen. Wearing long sleeves, sunglasses and a wide-brimmed hat also helps. Try to stay away from tanning beds. If you want your skin to look tan, use sunless tanning lotions or sprays instead.

Check your skin once a month. Look for changes in the size, shape or color of moles or spots. If you notice any changes, call your doctor and make an appointment.

Support for managing long-term health problems

Learn about your condition and get support to feel your best

Living with a long-term health problem can feel hard. You may feel worried or unsure. You are not alone. Learning about your health is the first step to feeling better and more in control.

You may have questions like:

- What is my health condition?
- How does it affect my body?
- What treatments can help me?
- What could happen if I don't make healthy changes?

Our Disease Management program is here to help. It gives you information and support so you can make good choices about your health.

We offer help with many health conditions, including:

- Asthma
- Attention deficit hyperactivity disorder (ADHD)
- Heart disease
- Chronic lung disease (COPD)
- Depression
- Diabetes
- Heart failure
- Hepatitis C
- High blood pressure
- Obesity
- Sickle cell disease

You can visit myuhc.com/communityplan/healthwellness to find tools, tips and support. These resources are made to help you take care of your health with confidence.

Supporting your Behavioral Health needs

Your health matters

Our **Behavioral Health Case Management** program is here to help you. Our licensed staff works with you to identify your mental health and substance use needs. They help you find the right providers and services. We help set up appointments and make sure your care team works well together. We also explain treatment options in a clear way. Our team supports you, helps you understand your benefits, and checks in on your progress.

Whether you need help finding resources, managing medicines, or handling challenges, we are here for you. We focus on care that is personal and centered on your needs.

To learn more or to talk with a Behavioral Health Case Manager, call the Special Needs Hotline at **1-877-704-8871**.
