Smoking is the leading cause of preventable death worldwide. Tobacco use raises the chances of heart and lung disease. It has an impact on your risk for certain vision threatening eye conditions.¹

Here are 10 reasons to not use tobacco:

1. **Cataracts**: Smoking cigarettes doubles the chances developing cataracts (a clouding of the lens of the eye).²

2. **Age-related macular degeneration**: Smoking triples the chances of getting macular degeneration (the loss of central vision). Smoking can also make it worse if you already have it. Macular degeneration is leading cause of blindness in those over the age of 65.³

3. **Glaucoma**: Cigarette smokers greatly raise their chances of developing glaucoma (high eye pressure that damages the optic nerve). This is another leading cause of blindness.⁴

4. **Diabetic retinopathy (for those with diabetes)**: Smoking raises the risk of changes in the blood vessels inside the eye that can cause blindness.⁵
5. **Dry eyes**: The irritating effects of cigarette smoke can cause red, dry, scratchy eyes.\(^6\)

6. **Problems with contact lens wear**: Smokers have a harder time wearing contact lenses than non-smokers. This is due to the dry-eye effects of smoking. They also have a greater chance of getting sores on the surface of the eye that can lead to blindness.\(^7\)

7. **Graves’ Disease**: Tobacco use increases the chance of developing eye problems related to thyroid disease.\(^8\)

8. **Uveitis**: Smokers double their risk of getting inflammation in the eye that can lead to cataracts and glaucoma.\(^9\)

9. **Secondhand smoke**: Secondhand smoke can cause dry eyes and make your contact lenses uncomfortable. Even if you don’t smoke, being around someone who does can hurt your health.

10. **Birth defects**: Women who smoke while pregnant raise their chances of having a baby with lazy eye and facial defects involving the eyes.\(^10\)

Vision loss related to cigarette smoking can be prevented.

**If you smoke – stop.**

Take charge of your eye health. Make sure a yearly comprehensive eye exam is part of your wellness plan.
