Answers to questions about the UnitedHealth Premium® program.

The UnitedHealth Premium program evaluates physicians in several specialties using evidence-based medicine and national standardized measures to help you locate quality and cost-efficient providers. It’s easy to find a UnitedHealth Premium Care Physician. Just log onto myuhc.com® and click on Find a Doctor. Choose smart. Look for blue hearts.

Quality is evaluated on evidence-based medicine and national industry guidelines. Cost-efficiency standards rely on local market benchmarks for the efficient use of resources in providing care. A doctor’s Premium designation is shown on myuhc.com and in provider directories.

1. What are the possible UnitedHealth Premium designations?

There are several possible Premium designations for a doctor. Doctors who have met the criteria for quality and/or cost efficiency could have one of these 4 UnitedHealth Premium designations. These designations are shown on myuhc.com and in provider directories.

If a doctor does not have a Premium designation, it does not mean he or she provides a lower standard of care. It could mean that the data available to us was not sufficient to include the doctor in the program. All doctors who are part of the UnitedHealthcare network must meet our standard credentialing requirements (separate from the Premium program).
2. **Why should I consider a doctor’s UnitedHealth Premium designation?**
   Where you get care is your personal choice. No two doctors are exactly alike and you probably think about many factors when choosing a doctor. The UnitedHealth Premium designation can help you make more informed and confident health care decisions.

4. **How is cost measured as a part of the UnitedHealth Premium program?**

The cost-efficiency standards are based on the care provided to a patient during the entire treatment for a condition. It can include the appropriate use of diagnostic testing, prescribed medications, any related procedures, and follow-up care and associated costs. The evaluation also factors in surgical redo rates and any complication-related costs.
