Preventive care for children and adults

Scheduling regular appointments and screenings may help you manage and maintain your health.
Focusing on regular preventive care can help you—and your family—stay healthier

Preventive care can help you avoid potentially serious health conditions and/or obtain early diagnosis and treatment. Generally, the sooner your doctor can identify and treat a medical condition, the better the outcome.

Under the Affordable Care Act (ACA),* most health plans provide coverage for certain preventive health care services at 100%, without any cost to you. Just obtain your preventive care from a health plan network provider. Diagnostic (non-preventive) services are also covered, but you may have to pay a copayment, coinsurance or deductible.

Preventive care guidelines for children**

Recommended preventive care services for children will vary based on age and may include some of the following:

- Age-appropriate well-child examination.
- Anemia screening.
- Behavioral counseling during well-child examination to prevent sexually transmitted infections.
- Behavioral counseling to prevent skin cancer at each well-child examination.
- Cholesterol screening for children 24 months and older.
- Fluoride application by primary care physician for children under age 6.
- Hearing screening by primary care physician.
- Newborn screenings, including metabolic screening panel, phenylketonuria (PKU), hypothyroid and sickle cell.
- Psychosocial/behavioral assessments during well-child examination.
- Assessments for tobacco, alcohol or drug use.
- Screening for obesity and counseling for children on promoting improvements in weight.
- Screening for sexually transmitted diseases, lead, depression and tuberculosis for certain children at high risk.
- Vaccines and immunizations. For more information, visit cdc.gov/vaccines.
- Vision screening by a primary care physician.

Not all children require all of the services identified above.*** Your doctor should give you information about your child’s growth, development and general health, and answer any questions you may have.
Preventive care screening guidelines and counseling services for adults**

A preventive health visit can help you see how healthy you are now and help identify any health issues before they become more serious. You and your doctor can then work together to choose the care that may be right for you. Recommended preventive care services may include the following:

- Abdominal aortic aneurysm screening for adults who are 65–75 years old and have ever smoked.
- Alcohol screening during wellness examinations, with brief counseling interventions for certain people.
- Bacteriuria screening during pregnancy.
- Blood pressure screening at each wellness examination. Certain people may also require ambulatory blood pressure measurements outside of a clinical setting. Check with your doctor.
- Breastfeeding counseling, support and supplies during pregnancy and after birth. Includes a personal-use electric breast pump.
- Breast cancer medications for risk reduction (counseling) for women at high risk of breast cancer, but low risk for adverse effects.
- Cervical cancer screening (Pap smear) for women who are 21–65 years old.
- Chlamydia and gonorrhea infection screening for sexually active women who are 24 and younger, and older women at increased risk.
- Cholesterol screening for adults who are 40–75 years old.
- Colorectal cancer screening for adults who are 50–75 years old. Ask your physician about screening methods and intervals for screening.
- Contraceptive methods that are FDA-approved for women, including education and counseling.
- Depression screening for all adults, in a primary care setting.
- Diabetes screening for adults who are 40–70 years old and overweight or obese, or for those of any age who have a history of gestational diabetes.
- Falls prevention counseling for community-dwelling older adults, during wellness examination.
- Genetic counseling and evaluation for BRCA testing and BRCA lab testing. Lab testing requires prior authorization.
- Gestational diabetes mellitus screening during pregnancy.
- Healthy diet behavioral counseling for people with cardiovascular disease risk factors, in a primary care setting.
- Hepatitis B virus infection screening during pregnancy and for people at high risk.
- Hepatitis C virus infection screening for adults who are 18–79 years old.
- Human immunodeficiency virus (HIV) screening for all adults.
- Human papillomavirus DNA testing for women who are 30 and older.
- Latent tuberculosis infection screening for people at increased risk.
- Lung cancer screening with low-dose CT scan for people who are 55–80 years old with at least a 30 pack per year history (with prior authorization).
- Mammography screening.
- Obesity screening and counseling at each wellness examination.
- Osteoporosis screening for women who are 65 and older and younger women at an increased risk.
- Perinatal depression counseling for pregnant or postpartum women at risk.
- Prevention of HIV and pre-exposure prophylaxis (PrEP), with antiretroviral therapy, monitoring and testing.
- Rh incapability screening during pregnancy.
- Screening for anxiety for women, during wellness examination.
- Screening for urinary incontinence for women, during wellness examination.
- Screening for intimate partner violence for women, during wellness examination.
- Sexually transmitted infections behavioral counseling for prevention for adults who are sexually active or otherwise at increased risk, in a primary care setting.
- Skin cancer behavioral counseling for prevention for young adults up to age 24 at each wellness examination.
- Syphilis screening for adults at an increased risk.
- Tobacco cessation, screening and behavioral counseling for adults who smoke, in a primary care setting (refer to pharmacy vendor for pharmacotherapy for tobacco cessation).
- Vaccines and immunizations that are FDA-approved and have explicit ACIP recommendations for routine use. For more information, visit cdc.gov/vaccines.
- Wellness examinations.
- Well-woman visits, including routine prenatal visits.

continued
Certain preventive care items and services, including immunizations, are provided as specified by applicable law, including the Patient Protection and Affordable Care Act (ACA), with no cost-sharing to you. These services may be based on your age and other health factors. UnitedHealthcare also covers other routine services, and some plans may require copayments, coinsurance or deductibles for these benefits. Always review your benefit plan documents to determine your specific coverage details.

These guidelines are based, in part, on the requirements of the Patient Protection and Affordable Care Act, and recommendations of the U.S. Preventive Services Task Force (USPSTF), the Health Resources & Services Administration (HRSA) of the U.S. Department of Health and Human Services, and the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC). Individuals with symptoms or at high risk for disease may need additional services or more frequent interventions that may not be covered as a preventive benefit. These guidelines do not necessarily reflect the vaccines, screenings or tests that will be covered by your benefit plan. These clinical guidelines are provided for informational purposes only, and do not constitute medical advice. Preventive care benefits may not apply to certain services listed above. Always refer to your plan documents for specific benefit coverage and limitations or call the toll-free member phone number on your health plan ID card.

Development, psychosocial and chronic disease issues for children and adolescents may require frequent counseling and treatment visits separate from preventive care visits. These guidelines represent a consensus by the American Academy of Pediatrics (AAP) and Bright Futures. The recommendations in this statement do not indicate an exclusive course of treatment or standard of medical care. Variations, taking into account individual circumstances, may be appropriate. Discuss with your doctor how these guidelines may be right for your child, and always consult your doctor before making any decisions about medical care. These clinical guidelines are provided for informational purposes only, and do not constitute medical advice. Preventive care benefits may not apply to certain services listed above. Always refer to your plan documents for your specific coverage.
