

# Questions to ask your doctor about vaccines for your child

When it comes to your child and vaccines, you may have questions. Here's a suggested list of questions to ask your doctor at your child's next appointment.

- At what age should my child start getting vaccines?
- What are the benefits of getting my child vaccinated?
- What diseases do vaccines prevent?
- Are vaccines safe?
- How are vaccines made?
- Can vaccines cause side effects?
- Which vaccines does my child need and when?
- Could multiple vaccines given at the same time overwhelm my child's immune system?
- What ingredients are in vaccines and what do they do?
- Could my child get a disease after being vaccinated?
- Could the vaccine give my child the disease?
