Welcome to UnitedHealthcare.
Getting started with your plan.
Matching the most of your plan.

Thanks for choosing UnitedHealthcare. You’re off to a great start. Here are a few tips to help you get the most out of your plan.

Choosing a doctor.

With this plan, you need to choose a primary care provider, sometimes called a primary physician or PCP. Your PCP coordinates your care. If you haven’t done so already, go to myuhc.com or call the member number on your health plan ID card, TTY 711.

Seeing a specialist.

You will need to get a referral from your PCP to see a specialist. Please make sure your PCP sends us an electronic referral before you make an appointment. You don’t need a referral to see a gynecologist (OB-GYN) or a mental health professional as long and they are in your network and service area.

Getting prescriptions.

Your plan covers prescription drugs from network pharmacies. Co-pays vary based on the medication tier (1, 2 or 3). Visit myuhc.com for more info.

Using network providers.

A network provider is a doctor, health care professional or facility (like a hospital or laboratory) that has a contract with us at discounted rates.

Make sure the doctors and pharmacies you use today accept your health plan. The name of your plan is on your health plan ID card. If you see a doctor that does not accept your plan, you will likely have higher out-of-pocket costs.

To find a network provider, please visit myuhc.com, or call the member number on your health plan ID card, TTY 711.

By following the above tips, you’ll ensure you get the most from your health plan and avoid unexpected surprises.
