

Important Notice to Texas Members under UnitedHealthcare of Texas, Inc.

Notice of Coverage for Acquired Brain Injury

Your health benefit plan coverage for an acquired brain injury includes the following services when they are medically necessary:

- Cognitive rehabilitation therapy
- Cognitive communication therapy
- Neurocognitive therapy and rehabilitation
- Neurobehavioral, neurophysiological, neuropsychological and psychophysiological testing and treatment
- Neurofeedback therapy and remediation
- Post-acute transition services and community reintegration services, including outpatient day treatment services or other post-acute care treatment services
- Reasonable expenses related to periodic reevaluation of the care of an individual covered under the plan who has incurred an acquired brain injury, has been unresponsive to treatment, and becomes responsive to treatment at a later date, at which time the cognitive rehabilitation services would be a covered benefit

The fact that an acquired brain injury does not result in hospitalization or acute care treatment does not affect the right of the insured or the enrollee to receive the preceding treatments or services commensurate with their condition. Post-acute care treatment or services may be obtained in any facility where those services may legally be provided, including acute or post-acute rehabilitation hospitals and assisted living facilities regulated under the Health and Safety Code.
