Understanding your prescription drug list

What is a prescription drug list (PDL)?

A PDL is a list of prescribed medications or other pharmacy care products or supplies chosen for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications.

To create the list, UnitedHealthcare® is guided by the Prescription Drug List Management Committee (PDL MC). This group reviews which medications will be covered based on their overall value. Medications are chosen for their safety, cost and effectiveness. The committee also makes sure there are safe and covered options.

About this PDL

Where differences between this document and your benefit plan exist, the benefit plan documents rule. This may not be a complete list of medications that are covered by your plan. Please review your benefit plan for full details.

How do I use my PDL?

You and your health care provider can use the PDL to help you choose the most cost-effective prescription medications. This guide tells you if your medication is covered, what tier your medication is considered under your plan, and if your medication has coverage rules or limits. You can reference this list when you see your health care provider. You can also search for medications at **myuhc.com/exchange** and find the PDL in the **Pharmacies & Prescriptions** section.

What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, and you can find cost-sharing information in your plan documents. This determines how much you will pay when you fill a prescription at a network pharmacy. Using lower-tier medications may help you pay the lowest out-of-pocket cost. If you are prescribed a medication on a higher tier, you can ask your health care provider if a lower-tier medication can work for your condition. In the chart below, the overall value is based on factors such as medication's effectiveness, safety, cost, and the availability of alternative medications that can work for your condition.

Tier	Cost-share	Includes
1	$0	**$0 Cost-share** Medications available at no cost to you, which includes **preventive medications.**
2	$	**Lower cost-share** Medications that offer the **highest overall value,** which includes **preferred generic medications.**
3	$$	**Mid-range cost-share** Medications that provide **good overall value,** which includes **preferred brand name** and **non-preferred generic** medications.
4	$$$	**Higher cost-share** Medications that provide **lower overall value,** which includes **non-preferred brand name** and **non- preferred generic** medications.
5	$$$$	**Highest cost-share** Medications that provide the **lowest overall value,** which includes most **specialty** medications.

Can the PDL change?

Most changes in drug coverage typically happen on January 1st. However, changes that have a positive impact for you—such as coverage for new medications or cost savings—may occur at any time.

Why are some medications not covered?

Non-formulary medications

Medications that are not covered on your PDL are also called non-formulary medications. We review treatments based on their total value, including how well they work, how safe they are, their cost and whether options are available to treat the same or similar medical conditions. Certain medications may not be covered if your plan covers other medications for your condition. Talk to your health care provider. They may be able to ask about an exception to get your medication covered or may switch you to a covered medication that can work for your condition. See the Prior authorization and exception requests section.

Excluded medications

Review your benefit plan documents to see if any medications are excluded from your plan. If excluded, ask your health care provider if covered medications may work for you.

Coverage details

What are coverage rules or limits?

Some medications on your PDL have extra rules before they can be covered. A few of the most common coverage rules or limits are prior authorization (PA), quantity limits (QL). We use programs like these to help make sure the medication you take is safe and effective. Check your plan documents for more information. In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage rules or limits. Your benefit plan sets how these medications may be covered for you. To get a medication that has a coverage rule or limit, see the "Prior authorization and exception requests" section. For more information about quantity limits, please visit: **https://welcome.optumrx.com/rxexternal/external-prescription-drug-list?type=ClientFormulary&var=GPX527NJ&infoid=GPX527NJ&page=insert&par=**

PA	**Prior authorization required**
	Requires your health care provider to provide information about why you are taking a medication before your plan can decide how it may be covered.
QL	**Quantity limit**
	A restriction on the quantity of medication covered by your plan.
SP	**Specialty medication**
	Specialty medications treat complex or rare conditions and may require special storage and handling. Specialty medications may not be available at a retail pharmacy. You may have to get these medications from a specialty pharmacy.

MME	**Morphine milligram equivalent and 7-day limit if you have not filled an opioid prescription recently**
	Additional quantity limits may apply across all drugs in the opioid class used for the treatment of pain. This additional limit is called a cumulative morphine milligram equivalent (MME) and is designed to monitor safe dosing levels of opioids for individuals who may be taking more than 1 opioid drug for pain management. If your health care provider prescribes more than this amount, or thinks the limit is not right for your situation, you or your health care provider can ask the plan to cover the additional quantity.
7D	**7 day limit if you have not filled an opioid prescription recently**
	If you have not filled an opioid prescription recently, you may be limited to a 7-day supply. This limit is intended to minimize initial duration if you do not have recent history of opioid use. For members who are new to the plan and have a recent history of using opioids, the limit may be overridden by the pharmacy. For members who have filled an opioid recently, prescriptions are limited to a 1 month supply.

Which preventive medications are covered?

Your UnitedHealthcare Individual & Family plan covers certain preventive medications and supplements at no cost to you when filled at a network pharmacy.

Under the Affordable Care Act (ACA) of 2010, prescription and over-the-counter (OTC) preventive medications and supplements include:

- Aspirin to prevent preeclampsia during pregnancy
- Birth control (contraceptives)
- Bowel preparation for a colonoscopy needed for colon cancer screening
- Breast cancer preventive medications
- Fluoride to prevent dental cavities
- Folic acid to prevent birth defects
- Gonococcal Ophthalmia Neonatorum preventive medications
- Human Immunodeficiency Virus (HIV) infection pre-exposure preventive (PrEP) medications
- Statin medications to prevent cardiovascular events
- Tobacco cessation medications to help you quit smoking
- Vaccines

We follow recommendations by the U.S. Preventive Services Task Force and the Health Resources and Services Administration.

Preventive medications are listed as Tier 1 or are noted as $0 Copay medications in this drug list. Some medications are available at no cost to you only when certain requirements are met. As noted in this list, we may need your health care provider to provide information about your medical condition to confirm that you meet the requirements to obtain the preventive medication at no cost. Follow the steps in the "Prior authorization and exception requests" section. If you qualify, you can receive these drugs at $0 cost-share. If you are using it to treat another medical condition, a cost-share may apply.

What medications are covered under my medical benefit?

Prior authorization and exception requests

Some medications require prior authorization or may need an exception. This includes medications that:

- Require a prior authorization, including compounded prescription medications
- Exceed quantity limits
- Exceed opioid safety edits
  - 7-day supply limit for members who have not filled an opioid prescription recently or
  - Opioid use that exceeds the established morphine milligram equivalent (MME) level
- Are not listed in the PDL (also called non-formulary drugs)
- May be covered at no cost when specific requirements are met such as preventive medications

How can I get a medication that requires a prior authorization or an exception?

Optum Rx, our Pharmacy Benefit Manager, processes prior authorization and exception requests on behalf of UnitedHealthcare Individual & Family plans. Contact your health care provider to submit a request. Health care providers can submit a request:

- Online: **professionals.optumrx.com/prior-authorization.html**
- Phone: 1-800-711-4555

The request should include the diagnosis, medication history, clinical justification, medical records/lab tests as needed and other supporting information. If information is missing, Optum Rx will contact your health care provider and request additional information.

We'll send written notification of the decision to both you and your health care provider. If your health care provider does not agree with the decision, the notification will provide instructions on requesting a peer-to-peer review or requesting an appeal.

You and your health care provider can learn more and find clinical criteria by visiting **uhcprovider.com/exchange**.

Medication tips

What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less. If you are taking a non-formulary brand-name medication that has a generic equivalent, you may also be responsible for the difference in cost between the brand-name drug and the generic equivalent. Check your plan documents for more information.

What if my health care provider writes a brand-name prescription?

If your health care provider gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

Over-the-counter medications

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your health care provider about available OTC options. Even though OTC medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

Reading your PDL

The PDL gives you choices so you and your health care provider can decide your best course of treatment. In this PDL, brand-name medications are shown in UPPERCASE (for example, JARDIANCE). Generic medications are shown in lowercase (for example, atorvastatin). There are 2 ways to find your drug within the PDL:

1. By category – the drugs in this formulary are grouped into categories depending on the medical conditions that they are used to treat. For example, drugs used to treat an infection are generally listed under the category, Antibacterial. If you know what your drug is used for, look for the category name, then look under the category name for your drug .
2. By alphabet – if you are not sure what category to look under, you should look for your drug in the Index. The Index provides an alphabetical list of all the drugs included in this document for both brand name drugs and generic drugs. Review the Index to find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to that page listed in the Index and find the name of your drug in the first column of the list .
