Summary of formulary benefits

The information in this document is designed to help you understand the prescription drug benefits offered under this plan and to compare these benefits to those offered by other plans. Information contained in this summary is designed to help you compare both the value and scope of formulary benefits.

How to find information on the cost of prescription drugs

When you shop for a plan, you can check the price of a drug to see if it's covered and estimate your costs by visiting **welcome.optumrx.com/texas**. The price estimate you see is based on the most recent network pricing and does not reflect any deductible requirements your plan may have. Once your plan is effective, you can check the price of a drug by visiting **myuhc.com/exchange**.

You can also use this Prescription Drug List (PDL) to find the tier of your medication and your Summary of Benefits and Coverage (SBC) document to find the cost-share for the corresponding tier.

Formulary by health benefit plan

The same formulary (this PDL) applies to all plans included below. You can reference your Summary of Benefits and Coverage (SBC) document, which includes your specific plan information. Your SBC includes your deductible and out of pocket maximums, cost-shares for each tier, and a link to your PDL.

Drugs by cost sharing tier

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, set by UnitedHealthcare®. This determines how much you will pay when you fill a prescription at a network pharmacy.

Drug tier	Cost share	% of drugs
Tier 1	$0	14%
Tier 2	$	38%
Tier 3	$$	21%
Tier 4	$$$	17%
Tier 5	$$$$	11%

How prescription drugs are covered under the plan

Formulary composition

A PDL or a formulary is a list of covered prescribed medications or supplies chosen for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications. UnitedHealthcare's formulary is considered a closed formulary, in which only medications included in the formulary are covered. A drug that is not on the formulary may be covered by requesting an exception. Medications included on the formulary do not guarantee that your health care provider will prescribe that medication for a particular condition.

To create the list, UnitedHealthcare® is guided by the Prescription Drug List Management Committee (PDL MC). This group reviews, on at least a quarterly basis, which medications will be covered, based on how well the drugs work, and overall value. They also make sure there are safe and covered options.

About this PDL

Where differences between this document and your benefit plan exist, the benefit plan documents rule. This may not be a complete list of medications that are covered by your plan. Please review your benefit plan for full details.

Right to appeal

To get a medication not listed in the PDL, you, your authorized representative or your health care provider can ask for a coverage request by calling the number on your health plan ID card.

Once the request is received, a decision will be provided within 72 hours, unless state law requires faster response or there are exigent circumstances and an expedited review is requested, in which case a decision will be provided in 24 hours.

If approved, your cost share will be based on the second highest tier in your benefit plan design.

If the request is denied, you have the right to appeal or request an external review. Your denial letter will describe the process to appeal that decision or request an external review.

Continuation of coverage

You have the right to continue coverage for a prescription drug at the same coverage level or tier at which the drug was covered at the beginning of the plan year, until your plan renewal date.

Off-label drug use

We may provide coverage for off-label drug use. Off-label use of FDA approved drugs occurs when a drug is prescribed for a reason that has not been approved by the FDA. Off-label drug use may be covered when all of the following apply:

- Drug has been approved by the Food and Drug Administration for at least one indication
- Drug is recognized for treatment of the indication for which the drug is prescribed in:
  - a standard drug reference compendium; or
  - substantially accepted peer-reviewed medical literature

Cost sharing

Your plan specific cost-shares (deductible, out of pocket max, and tier costs) at a network pharmacy are listed on your Summary of Benefits and Coverage document. Your deductible is the amount of money that you and anyone covered by your plan must pay out-of-pocket each plan year for covered services before your plan starts to pay. The out-of-pocket cost share for covered prescriptions applies to your deductible until your deductible is met. Your cost share may be a copayment (an amount you pay out-of-pocket for your prescription medicines after you've met any deductible) or coinsurance (a percentage of the total cost that you pay for your medicines, after you've met any deductible).

Using lower-tier medications can help you pay your lowest out-of-pocket cost. Preferred medications (generic & brand) are in lower tiers. Non-preferred medications (generic & brand) are in higher tiers. If you are prescribed a medication on a higher tier, you should discuss with your health care provider if a lower tier medication may be appropriate for your condition.

In the chart below, the overall value is based on factors such as effectiveness, safety, cost, and the availability of alternative medications to treat the same or similar medical condition.

Your drug list has the following tiers:

Tier	Cost-share	Includes
1	$0	**$0 Cost-share** Medications available at no cost to you, which includes **preventive medications.**
2	$	**Lower cost-share** Medications that offer the **highest overall value,** which includes **preferred generic** medications.
3	$$	**Mid-range cost-share** Medications that provide **good overall value,** which includes **preferred brand name** and **non-preferred generic** medications.
4	$$$	**Higher cost-share** Medications that provide **lower overall value,** which includes **non-preferred brand name** and **non- preferred generic** medications.
5	$$$$	**Highest cost-share** Medications that provide the **lowest overall value,** which includes most **specialty** medications.

Medical management requirements

Some medications on your PDL have extra rules before they can be covered. A few of the most common coverage rules or limits are prior authorization (PA), quantity limits (QL), and step therapy (ST). We use programs like these to help make sure the medication you take is safe and effective. Check your plan documents for more information. In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage rules or limits. Your benefit plan sets how these medications may be covered for you. To get a medication that has a coverage rule or limit, see the "Prior authorization and exception requests" section.

PA	**Prior authorization required** Requires your health care provider to provide information about why you are taking a medication before your plan can decide how it may be covered.
QL	**Quantity limit** A limit on the amount of medication you can get at a time.
ST	**Step therapy** Requires you to try one or more medications before the medication you are requesting may be covered.
SP	**Specialty medication** Specialty medications treat complex or rare conditions and may require special storage and handling. Your plan limits specialty medications to a 1-month supply. Specialty medications may not be available at a retail pharmacy. You may have to get these medications from a specialty pharmacy.
MME	**Morphine milligram equivalent** Additional quantity limits may apply across all drugs in the opioid class used for the treatment of pain. This additional limit is called a cumulative morphine milligram equivalent (MME) and is designed to monitor safe dosing levels of opioids for individuals who may be taking more than 1 opioid drug for pain management. If your health care provider prescribes more than this amount, or thinks the limit is not right for your situation, you or your health care provider can ask the plan to cover the additional quantity.
7D	**7 day limit if you have not filled an opioid prescription recently** If you have not filled an opioid prescription recently, you may be limited to a 7-day supply. This limit is intended to minimize initial duration if you do not have recent history of opioid use. For members who are new to the plan and have a recent history of using opioids, the limit may be overridden by the pharmacy. For members who have filled an opioid recently, prescriptions are limited to a 1 month supply.

FAQs

How do I use my PDL?

You and your health care provider can use the PDL to help you choose the most cost-effective prescription medications.

This guide tells you if a medication is generic or brand, and if coverage rules or limits apply. You can reference this list when you see your health care provider. If your medication is not listed here, please visit **myuhc.com/exchange** or call the Member Services number on your health plan ID card.

Can the PDL change?

Most changes in drug coverage happen on January 1st, but during the year UnitedHealthcare may add or remove drugs on the PDL, move them to different cost-sharing tiers, or add or remove restrictions unless prohibited by state law. Changes that have a positive impact for you — such as coverage for new medications or cost savings — may occur at any time.

When a medication changes tiers, you may have to pay a different amount for that medication. Talk to your health care provider to learn about alternatives.

Why are some medications not covered?

A medication may not be covered under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less.

What if my health care provider writes a brand-name prescription?

If your health care provider gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

Over-the-counter medications

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your health care provider about available OTC options. Even though OTC medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

What if I am taking a specialty medication?

Specialty medications are for rare or complex conditions and are usually higher-cost medications. Specialty medications are indicated with SP throughout the PDL.

Please note, not all specialty medications may be available at a retail pharmacy. If you have question on how to access covered specialty medications, call the number on your health plan ID card or visit **myuhc.com/exchange**.

What medications are covered under my medical benefit?

To learn about medications covered under your medical benefit, visit **uhcprovider.com/content/dam/provider/docs/public/resources/pharmacy/IFP-Clinical-Program-Summary-Drug-List.pdf**.

Which preventive medications are covered?

Your UnitedHealthcare Individual & Family plan covers certain preventive medications and supplements at no cost to you when filled at a network pharmacy.

Under the Affordable Care Act (ACA) of 2010, prescription and over-the-counter (OTC) preventive medications and supplements include:

- Aspirin to prevent preeclampsia during pregnancy
- Birth control (contraceptives)
- Breast cancer preventive medications
- Bowel preparation for a colonoscopy needed for colon cancer screening
- Fluoride to prevent dental cavities
- Folic acid to prevent birth defects
- Gonococcal Ophthalmia Neonatorum preventive medications
- Human Immunodeficiency Virus (HIV) infection pre-exposure preventive medications
- Statin medications to prevent cardiovascular events
- Tobacco cessation medications to help you quit smoking
- Vaccines

We follow recommendations by the U.S. Preventive Services Task Force and the Health Resources and Services Administration.

Preventive medications are listed as Tier 1 or are noted as $0 Copay medications in this drug list. Some medications are available at no cost to you only when certain requirements are met. As noted in this list, we may need your health care provider to provide information about your medical condition to confirm that you meet the requirements to obtain the preventive medication at no cost. Follow the steps in the "Prior Authorization and Exceptions" section below. If you qualify, you can receive these drugs at $0 cost-share. If you do not qualify, you are responsible for the customary cost-share amount for your plan.

Prior authorization and exceptions

Some medications require prior authorization or may need an exception. This includes medications that:

- Require a prior authorization, including compounded prescription medications
- Require step therapy
- Exceed quantity limits
- Exceed opioid safety edits
  - 7-day supply limit for members who have not filled an opioid prescription recently or
  - Opioid use that exceeds the established morphine milligram equivalent (MME) level
- Are not listed in the PDL (also called non-formulary drugs)
- May be covered at no cost when specific requirements are met such as preventive medications.

How can I get a medication that requires a prior authorization or an exception?

Optum Rx, our Pharmacy Benefit Manager, processes prior authorization and exception requests on behalf of UnitedHealthcare Individual & Family plans. Contact your health care provider to submit a request. Health care providers can submit a request:

- Online: **professionals.optumrx.com/prior-authorization.html**
- Phone: **1-800-711-4555**

The request should include the diagnosis, medication history, clinical justification, medical records/lab tests as needed and other supporting information. If information is missing, Optum Rx will contact your health care provider and request additional information.

We'll send written notification of the decision to both you and your health care provider. If your health care provider does not agree with the decision, this notification will provide instructions on requesting a peer-to-peer review or requesting an appeal.

You and your health care provider can learn more and find clinical criteria by visiting **uhcprovider.com/exchange**.

How can I get a medication not listed on the PDL covered?

Your health care provider can ask for a coverage request by following the instructions above. Once the request is received, a decision will be provided within 72 hours, unless there are exigent circumstances and an expedited review is requested, in which case a decision will be provided in 24 hours. These responses may be shorter based on state laws. If the request is denied, information will be provided describing the process to appeal that decision and request an external review.

Reading your PDL

The PDL gives you choices so you and your health care provider can decide your best course of treatment. In this PDL, brand-name medications are shown in UPPERCASE (for example, JARDIANCE). Generic medications are shown in lowercase (for example, atorvastatin). There are two ways to find your drug within the PDL:

1. By category – the drugs in this formulary are grouped into categories depending on the medical conditions that they are used to treat. For example, drugs used to treat an infection are generally listed under the category, Antibacterial. If you know what your drug is used for, look for the category name, then look under the category name for your drug.
2. By alphabet – if you are not sure what category to look under, you should look for your drug in the Index. The Index provides an alphabetical list of all the drugs included in this document for both brand name drugs and generic drugs. Review the Index to find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to that page listed in the Index and find the name of your drug in the first column of the list.
