Imagine a better health care experience... One with no surprises.

You deserve to feel confident in your health care choice. That’s what you can expect from a UnitedHealthcare Navigate® plan with Arizona Care Network (ACN). UnitedHealthcare has teamed up with ACN, which includes Phoenix Children’s Care Network, to bring you access to quality, affordable care that puts you and your family in the center of a coordinated care experience. You’ll be surrounded by doctors, hospitals and other professionals ready to provide all the quality care you need. This team is led by your primary care physician (PCP).

Think of your PCP as your trusted, single point of contact who provides appropriate clinical care and helps you save time and money.

What does your PCP do?

A PCP is your main doctor who oversees your care to help you get and stay healthy. Your PCP:

- Provides preventive and routine care.
- Helps with your chronic conditions.
- Guides you to the specialists you may need.
- Manages your medications.
With UnitedHealthcare Navigate, you have access to more than 4,000 local physicians and facilities in the Valley through Arizona Care Network and Phoenix Children's Care Network.

What does an easier health care experience feel like?

It’s that feeling you get when you’re in control. You’ll experience it when you have the support, resources and tools you need to get the best care at the best price for you and your family. UnitedHealthcare Navigate offers health care benefits centered around you, including:

- A PCP as your main doctor, who also grants referrals when services from specialists are needed.
- Access to more than 4,000 local physicians and facilities recognized for quality and performance, including nearly 1,000 pediatric specialists and pediatricians in Phoenix Children’s Care Network and all of Phoenix Children's sites of service.
- A holistic approach to your health that includes behavioral health programs and community resource assistance.
- An after-hours and weekend nurse triage line.
- Guidance for members with chronic conditions from a team of pharmacists, nurses and social workers.
- Innovative care management programs for members with complex health care needs.

Take action to make the most of your health care.

1. Choose a PCP for you and each member of your family enrolled in the plan.
2. Get an electronic referral from your PCP before you see another provider, including specialists.
